PROFILE SUMMARY

Software Developer with 2 years of experience in service-based and product-based startups. Experienced in building responsive frontend applications using React.js and integrating REST APIs with Spring Boot backends. Strong understanding of product workflows, real-time data handling, and scalable web applications. Seeking to contribute to a stable, growth-oriented engineering team.

TECHNICAL SKILLS

- | | | | |
|--------------|---------------|---------------|-------|
| • JavaScript | • Redux | • Java | • SQL |
| • React JS | • React Query | • Spring Boot | • Git |

PROFESSIONAL EXPERIENCE

- Software Developer, Real Tech GPS Pvt Ltd, Erode****Feb 2025 - Present**
 - Designed and developed scalable React.js components for real-time dashboards and administrative panels, supporting dynamic data rendering and modular architecture.
 - Integrated RESTful APIs from Spring Boot backend using Axios and React Query, improving data fetching efficiency and reducing redundant API calls through caching strategies.
 - Optimized UI performance using memoization, lazy loading, and efficient state management, enhancing cross-device responsiveness and reducing load time.
- Java Full Stack Developer, J3Soft Solutions Pvt Ltd, Hosur****Mar 2024 - Jan 2025**
 - Built and integrated RESTful APIs using Spring Boot and connected them with React.js frontend components to enable real-time data operations.
 - Implemented secure and optimized CRUD modules with proper validation and database interactions using SQL.

PROJECTS

- i-AWS (Automatic Weighing System)**

Technologies: JavaScript, PHP (Backend), SQL.

 - Led the frontend development of an automated weighing system, building responsive dashboards to display real-time vehicle weight data before and after product delivery.
 - Integrated backend APIs and developed live reporting modules with historical data views, enabling accurate tracking and operational monitoring.
- iChlorine – Real-Time Chlorine Monitoring Platform**

Technologies: React.js, React Query, Google Maps, Spring Boot, PostgreSQL

 - Built a scalable SPA using React and Vite for real-time chlorine level monitoring and reporting.
 - Integrated RESTful APIs and implemented efficient server-state management using React Query.
 - Developed interactive maps with Google Maps and Leaflet to visualize site locations, reservoirs, and device tracking.

EDUCATION

- BE-Electronics and Communication Engineer****2020 - 2024**

Velalar College of Engineering and Technology, Erode.
CGPA - 8.87
